## Interface

## 1.Preparation

Attention:

- 1.Place 5G CPE according to base station signal position of the operator to ensure good 5G signal quality, such as indoor window sill
2. Ensure 5G CPE at least 3M away from strong EMI sources, such as microwave oven, fridge, etc
- 3.Place 5G CPE on plane and fixed, no obvious shelter beside it.

## 2.Insert SIM Card

- 1.5G CPE bottom up, pull out SIM card rubber cover
- 2.SIM insert card slot(direction as marked on rubber cover), push in
- 3.Close rubber cover, put 5G CPE on flat, make sure SIM card 5G in service

## 3.Connect Power

Insert one side the power adapter into the socket, another side into 5G CPE power interface. Wait for 2-3 seconds, the power indicator lights up, indicated device powered on normally.

Note: make sure to use the correct power adaptor to avoid damaging the equipment

## 4.Start Configuration

Be sure to read the installation instructions in the quick installation manual carefully  
5G CPE need to wait 1-2 minutes after connecting the power adapter When 5G CPE signal indicator is blue, means 5G signal good. Please observe the status of the indicator and adjust the position properly

## FAQ

### Q:Power Adapter doesn't work

A:Check power cord connected correctly

### Q:Unable to search or connect to WiFi hotspots

A: Confirm WiFi indicator is always on in blue, or default configuration may be modified. Try to press the reset button for 10 seconds to restore the factory configuration

### Q:5G signal indicator does not work

A:Maybe 5G network is not covered here or the software function is not turned on Please confirm with your network operator

### Q:5G signal indicator is on, but can't access Internet

A: Please confirm whether your network operator has provided "APN" private network service or whether your SIM card is in arrears
